

# OLUWATOBILOBA BILEWU

Junior QA Engineer | Software Test Automation

Lagos, Nigeria | Oluwatobilobabilewu@gmail.com | (+234) 0905 550 0557 | [linkedin.com/in/oluwatobiloba-bilewu](https://www.linkedin.com/in/oluwatobiloba-bilewu) | [github.com/Bilex95](https://github.com/Bilex95)

## PROFESSIONAL SUMMARY

Detail oriented QA Engineer transitioning into software testing after 3+ years as a Product Designer, bringing strong analytical thinking, user centered instincts, and cross-functional collaboration skills to quality assurance. Completed a hands on Software Test Automation training program, building practical experience in manual testing (functional, regression, smoke, sanity, exploratory, end to end) and automation with Cypress. Comfortable writing clear test cases, documenting defects precisely, and working within Agile teams. Seeking a remote Junior QA / Test Engineer role to apply these skills and grow as a testing professional.

## CORE COMPETENCIES

**Testing Types:** Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, End-to-End (E2E) Testing, Exploratory Testing, Black box Testing, UAT Support

**Methodologies:** Agile (Scrum/Kanban), SDLC, STLC, Test Planning, Test Case Design, Requirement Analysis

**Automation Testing:** Cypress (BDD/Cucumber, custom commands, Page-Object-style structure), Playwright (fundamentals)

**API & Dev Tools:** Postman (API Testing), Git & GitHub (version control), GitHub Actions (CI/CD), Docker (basics), n8n (workflow automation), VS Code

**Languages:** JavaScript (test scripting with Cypress/Playwright)

**AI & Automation:** AI Agent & Voice Agent Building, Workflow Automation (n8n)

**Other:** Defect Documentation & Reporting, Test Data Generation (Faker.js), Quality Metrics Awareness, Attention to Detail

## TECHNICAL PROJECTS

**Cypress & Cucumber Automated Test Suite — Signup/Login Web Application** | *Almond Careers Practical Training Project* 03/2026

GitHub: [github.com/Bilex95/Spring002](https://github.com/Bilex95/Spring002)

- Analyzed application requirements and authored Gherkin (BDD) feature files and step definitions covering Login, Signup, Profile navigation, and Settings navigation flows, translating user facing behavior into structured test scenarios.
- Automated the signup flow with Cypress custom commands, using Faker.js to generate dynamic test data and validate both valid- and invalid-credential paths.
- Verified UI state and navigation logic across the dashboard, profile, and settings pages, asserting correct URL redirects and element visibility after each user action.
- Integrated the test suite into GitHub Actions so the full Cypress regression suite runs automatically on every push and pull request, supporting early defect detection in CI.

**AAC Quick-Phrase Assistant — Accessibility-Focused Workflow Automation** | *Personal Project (n8n)* 2025

- Scoped a single, demoable accessibility feature an AAC (assistive communication) quick phrase assistant for children with assistive needs and defined the expected functional behavior to verify.
- Validated end-to-end request/response behavior of the automated n8n workflow, tracing inputs against expected outputs to confirm correct handling.
- Produced a sample log JSON artifact and a Mermaid architecture diagram as proof of work evidence, documenting real workflow behavior for review.
- Wrote a plain-language walkthrough of the request/response flow, applying the same documentation discipline and attention to detail used in structured QA test reporting.

## EDUCATION

**B.A. English Language** | *The Redeemer's University, Nigeria*

01/2015 – 01/2020

Senior School Certificate Examination (SSCE), Crown College, Ogun State — 05/2014

## CERTIFICATIONS & TRAINING

- **Certificate of Training Completion — Automation Software Testing**, Almond Careers (March 2026) — practical training in building ROI-driven Cypress test automation frameworks with CI/CD integration.
- **AI Builder: Create Agents, Voice Agents & Automations in n8n**, Udemy (July 2026, 14.5 hrs) — building AI agents, voice agents, and automated workflows in n8n.
